

We calculate our carbon footprint using the GHG Protocol standards. Our 2022 carbon footprint analysis covers Scope 1, Scope 2, and some elements of Scope 3 emissions.

Scope 1: Direct emissions from controlled sources, including natural gas and fuel oil.

Scope 2: Indirect emissions from purchased electricity, steam, heating, and cooling.

Scope 3: Indirect emissions (not included in Scope 2) that occur in our value chain, such as business travel, supply chain (tier 1), and waste.
